

Mobile Apps Development for Journalists

Week 12, Thursday - Fall 2016
University of Texas at Austin
School of Journalism

Jeff Linwood
jlinwood@gmail.com
@jefflinwood

Agenda

- Working with Locations Review
- Features we could implement
- Review of Arrays
- Adding multiple points to a Map

Working with Locations

- Anyone want to share some fun ideas for their projects?
- Challenges from drawing up the screens?

Additional Features

- What were some of the interesting ones?
- Any we could figure out how to add to an app today here in class?

Review of Arrays

- Lists of data
- Can be zero, one, or more
- What is an array index?
- Why do they start with zero?

My "First Place" Prize!

Swift Arrays

- More information here:
- <https://developer.apple.com/reference/swift/array>
- In-Class Exercise - Swift Playground

Adding multiple points to the Map

- In-Class Exercise - take the Map app from a few classes ago (with the Austin pin)
- Add Houston, Dallas, San Antonio and wherever your home town is for pins
