

Intro to Mobile Programming for Journalists

J335J – Unique ID: 08015

J395 - Unique ID: 08225

Fall 2016

Class Room: BMC 3.208

Instructor: Jeff Linwood

Office hours: Tuesdays: 4:00pm-4:50pm, Journalism Cubicles

Email: jlinwood@gmail.com

COURSE DESCRIPTION

This class is an introduction to user interface design, programming and software development for Apple's iPhone and iPad devices for journalism students. The class will be taught with the Swift language, which is a beginner-friendly programming language for iPhones and iPads from Apple. No knowledge of software development is required before the class.

Students will work together in small teams to complete assignments throughout the course of the semester.

OBJECTIVES

Students who complete all of the work for this course will be familiar with how mobile applications are developed for the iPhone and iPad. They will also understand some of the key concepts that go into building mobile applications for journalism, both to consume and to produce content.

To that end, they will:

- * Become familiar with Apple's XCode development environment on the Macintosh platform.
- * Understand mobile user experience patterns, and apply them to their applications
- * Write Swift code that interfaces with Apple's application programming interfaces (APIs) to power their iOS applications
- * Learn how to create a user interface for an iOS application using Storyboard

STRUCTURE

Student Teams

Students will pair up into two-person teams during the first week of class. If there are an odd number of students, there will be a three-person team, rather than a solo student. Only Mac computers (laptop or desktop) are able to run Apple's software development tools, so ideally each team will have at least one member with their own Mac. Students

will have access to lab computers with the development tools during class hours, and during any open lab hours for the classroom.

Existing Mobile Application Review

The first assignment for the class will be to explore existing mobile applications in the field of journalism and review them for usability and functionality. This assignment will be in the form of a short paper.

Due Date: Thursday, September 15, 2016, 5:00pm

Mobile Application Programming

There will be four team programming assignments. Assignments will be due on Thursdays before class starts at 5:00pm. The class on each Tuesday before the assignment is due will be dedicated to assignment work, so that students can work on the projects in teams.

The assignments are:

- * Beginning User Interface Development with Storyboard (Assignment 2) (Thursday, 9/29/16)
- * Integrating Multimedia (Assignment 3) (Thursday, 10/20/16)
- * Working with Locations (Assignment 4) (Thursday, 11/10/16)
- * Building a Map App (Assignment 5) (Thursday, 12/1/16)

Each assignment will have a grading rubric that explains how the project will be evaluated. Teams will be required to submit the source code for each assignment to the instructor. Grading will be based on the rubric.

Graduate Students Only

In addition to the above coursework (shared with the undergraduate section), graduate students in the class will be required to submit a short essay (1,500 - 2,500 words) about privacy concerns with mobile applications for end users.

Due Date: Thursday, October 13, 2016, 5:00pm

Communication

One of the most important parts of software development is to learn by helping others. The class will use the Canvas discussion forum for communication and discussion.

ASSIGNMENT POLICY

Each of the assignments will be due before class starts.

Late work

All assignments turned in after deadline (the start of class) will be marked down 10 percentage points for the first 24 hours after the due time and then 10 percentage points for every 24 hours after that.

Grade Components

Mobile Application Review: 10%

=====

Mobile Application Review: 10 % (Assignment 1)

Mobile Application Development (Source Code): (90% undergraduates, 80% graduate students)

=====

Beginning UI Development with Storyboard: 20% (Assignment 2)

Integrating Multimedia: 20% (Assignment 3)

Working with Locations: 25% (Assignment 4)

Building a Map App (45%, undergraduates, 35% graduate students) (Assignment 5)

Graduate Students Only: Essay 10%

=====

Essay: 10 % (Assignment 6)

Grade scale:

Grade	Percentage
A	93-100
A-	90-92
B+	87-89
B	83-86
B-	80-82
C+	77-79
C	73-76
C-	70-72
D	60-69

Attendance

The class does not have a required attendance policy, however attendance is strongly encouraged.

Contacting the instructor

The best way to get ahold of the instructor is email at jlinwood@gmail.com. If you have questions about programming, post your question on Canvas as well. Students are encouraged to help other students out with their software development questions.

Other important information

* Your grades and the submission of your evaluations will be handled through Canvas.

* University Honor Code: All students are expected to abide by the University of Texas Honor Code, which reads: “The core values of The University of Texas at Austin are learning, discovery, freedom, leadership, individual opportunity, and responsibility. Each member of the university is expected to uphold these values through integrity, honesty, trust, fairness, and respect toward peers and community.”

* Students with Disabilities Please notify your instructor of any modification/adaptation you may require to accommodate a disability-related need. You will be requested to provide documentation to the Dean of Student's Office in order that the most appropriate accommodations can be determined. Specialized services are available on campus through Services for Students with Disabilities. <http://www.utexas.edu/diversity/ddce/ssd/>

*Policy on Scholastic Dishonesty: The University defines academic dishonesty as cheating, plagiarism, unauthorized collaboration, falsifying academic records, and any act designed to avoid participating honestly in the learning process. Scholastic dishonesty also includes, but is not limited to, providing false or misleading information to receive a postponement or an extension on a test, quiz, or other assignment, and submission of essentially the same written assignment for two courses without the prior permission of the instructor. By accepting this syllabus, you have agreed to these guidelines and must adhere to them. Scholastic dishonesty damages both the student's learning experience and readiness for the future demands of a work-career. Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and/or dismissal from the University.

http://deanofstudents.utexas.edu/sjs/acint_student.php. For the University's official definition of scholastic dishonesty, see Section 11-802, Institutional Rules on Student Services and Activities.
